850-564-2291

Milton, Fla. — The Florida Department of Health in Santa Rosa County (DOH-Santa Rosa) and Santa Rosa Animal Control will host a drive-through rabies vaccination clinic for dogs and cats, Friday, October 22, from 4:00 p.m. to 6:00 p.m. at the Animal Services facility, 4451 Pine Forest Road in Milton.

Veterinarians from Pace Veterinary Clinic and The Ark Animal Hospital will provide the vaccine and administer the injections for a \$10.00 fee. Cash and checks will be accepted. A valid driver's license will be required for all checks. A certificate of vaccination and rabies tag will be provided. No other services will be available. Pets must be secured in a vehicle, crate or on leash.

"Once again we are happy to be able to partner with Animal Control and the local veterinarians to provide this service," said Sandra L. Park-O'Hara, APRN, administrator of the Florida Department of Health in Santa Rosa County. "These clinics are always well attended. Typically, the veterinarians and their staff will vaccinate 200 to 300 dogs and cats. It's a very worthwhile effort."

Rabies is a disease that affects the brain. The virus is carried in the saliva of infected animals and is usually transmitted to people and other animals through a bite or scratch. In the U.S., more than 90 percent of rabies cases occur in wild animals, such as raccoons, foxes, skunks and bats, but domesticated animals can carry it as well.

An animal suffering from rabies may appear sick or lethargic, have problems swallowing, or drool or salivate excessively. A wild animal may appear tamer than usual and try to approach people. Some animals may have no visible symptoms at all. Even baby animals can carry rabies. That is why it is important to avoid contact with not only adult animals, but baby animals as well, no matter how cute they may be. Rabies is fatal to humans and animals, but rabies in humans can be prevented if rabies vaccine is administered as soon as possible after exposure. The best and easiest way to prevent pets from contracting rabies is by getting them a rabies shot.

Treating individuals that have been exposed to rabies can be expensive, and insurance does not always cover the cost. Those seeking postexposure treatment are usually seen first in a hospital emergency room to begin the shots and may receive the rest of the four-shot series at the health department. In 2020, DOH-Santa Rosa provided 94 postexposure rabies shots, at a cost of approximately \$35,250.00.

The Department of Health advises the public to take these precautions to avoid exposing themselves or their pets to rabies:

- Avoid all contact with wild and unfamiliar domesticated animals, both adult and young. Never attempt to pick up or pet a wild or unfamiliar animal.
- Do not try to help wounded animals or baby animals that appear to be orphaned. Contact animal control to deal with domesticated animals and the nearest Florida Fish and Wildlife Conservation Commission Office, or a licensed wildlife rehabilitator, for wild animals. For a list of licensed wildlife rehabilitators, go to <https://myfwc.com/conservation/you-serve/wildlife/injured-orphaned/>
- Do not place feeders in the yard – food will attract unwanted animals such as raccoons and foxes.
- Do not leave pets outside unsupervised.
- Bring in pet food at night and secure trash cans with fasteners.
- Cover bird feeders. Most squirrel-proof coverings also deter wild animals.
- Children should never chase or attempt to catch or touch a wild or unfamiliar animal, and should tell an adult if a wild or strange animal tries to approach them.
- **Vaccinate pets against rabies and keep their vaccinations up to date.** Follow your veterinarian's recommendation for revaccination.

If bitten or scratched by a wild animal, or stray domesticated animal, wash the wound immediately with soap and water. This is the first line of defense against rabies! Seek medical attention immediately and report the incident to Santa Rosa Animal Control at 983-5680, or the Florida Department of Health in Santa Rosa County at 983-5200.

For more information on the drive-through clinic, contact Tom Verlaan at 983-5200, ext. 2278 or Matt Dobson at 983-5200, ext. 2233.
